

LLM Shield – Project Overview & System Workflow

Sensitive Data Protection & Audit Framework for Large Language Models

Core Modules & Features

- User Input & Document Ingestion
- Universal 20-Entity PII Detection
- Aadhaar & PAN Card Partial Masking
- Prompt Injection & Jailbreak Defense
- Context-Preserving Privacy Shield
- Secure Prompt Generation Pipeline
- Multi-Model LLM Gateway Support
- Output Safety Validation & Filtering
- Secure Response Delivery to User
- Cryptographic Audit Trail Logging

Common Examples

12) □ PAN Card (XXXXX1234F) □ Bank Account (XXXXXXXX8901)

4) □ Credit/Debit Card □ UPI ID (s****@oksbi)

Number □ Developer API Keys □ Passwords

Key Security Features

- PII Detection (Regex + NLP Transformer Spans)
- Context-Preserving Partial Data Masking
- SHA-256 Cryptographic Audit Logging
- Prompt Injection & DAN Jailbreak Protection
- Real-Time Output Safety & Leakage Validation
- Zero-Trust Secure AI Interaction Gateway
